---

Good morning,

With regards to Bill 84 NSAC-Dal merger Act I am severely disappointed that the government has so quickly chosen to process this legislation from First reading on May 8th, to what I understand is law Amendments May 11th. I do not comprehend how the value of people and their families is so poorly valued. As of the March 23rd announcement, the promises stated are in the process of no longer being recognized.

It is ESSENTIAL that we remain our own local! The faculty of Agriculture is unique and requires recognition just as any other former civil servant had in the past. Changes that are subject to be 'minor' severely impact us as employees. As a relatively new (2004) employee, I have become extremely devoted to my position, and consequently dedicated my family to this area. Please take the time to recognize each change and the impact that it will make.

I look forward to hearing from you,  
Audrie-Jo McConkey
