I own 40 acres of woodland that I use for personal use. I cut my firewood and logs for lumber. If I'm not able to cut my own firewood I would not be able to afford to heat my house. You encourage people to get outside and now your trying to take that away from us. I have made my living in and around the forest all my life as almost everybody I know. This is not something that should even be discussed. I suspect those that are pushing for this have probably not lived in the country where incomes are lower, so we have to make ends meet wherever possible and for me that means cutting my own wood, also it gives me a place to go and enjoy nature at it's best not a manufactured park that costs thousands of dollars to create and operate. So please don't let this bill go through and ruin the livelihood of thousands of people. We have maintained our forests for all these years and I think we are capable of continuing to maintain them.
