Good morning,

I am a resident of Halifax Needham and am sending a written submission for the Public Bills Committee regarding Bill 6, An Act Respecting Agriculture, Energy and Natural Resources.

My stance is simply that I do not support lifting the bans on fracking and uranium exploration in Nova Scotia. We are in a climate emergency and I do not support further oil & gas projects, nor do I think investing in these industries is good governance, or reflects sound judgement, when we are at a crisis point. Nova Scotians want & deserve leadership that will help facilitate a just transition for workers into green jobs in renewable industries, not leaving anyone behind. I hope we all have the courage to imagine how we can do things differently, not simply falling back on the tools of the past, but creating a future that invests in people and takes seriously our need to protect our province and planet.

Thank you,

Emily Fearon
